PROFESSIONAL SUMMARY

Results-oriented **Platform Engineer** with 6+ years of experience specializing in **Google Cloud Platform (GCP)** and **Kubernetes**. Proven track record in designing scalable, secure, and resilient cloud infrastructure using **Terraform (IaC)**. Expert in fostering a "self-service" engineering culture by collaborating with development teams to build reusable components and streamlined **GitLab CI/CD** pipelines. Passionate audio content consumer with deep interest in the creator economy and media-streaming scalability.

TECHNICAL SKILLS

- **Cloud:** Google Cloud Platform (GCP) — GKE, Cloud Run, Artifact Registry, Cloud Logging, Cloud Monitoring.
- **Infrastructure as Code:** Terraform, Terragrunt, Ansible.
- **Containers:** Kubernetes (K8s), Docker, Helm.
- **CI/CD & Tools:** GitLab CI (Expert), Cloudflare, GitHub Actions.
- **Observability:** Prometheus, Grafana, ELK Stack.
- **Languages:** Python (Advanced), Java, Kotlin, Bash.
- **Security:** WAF, SSL/TLS Management, IAM Least Privilege.

PROFESSIONAL EXPERIENCE

StreamVibe Media | Berlin, Germany

Senior DevOps Engineer | Jan 2022 – Present

- Design and deploy resilient infrastructure on **GCP** for a high-traffic media platform, ensuring 99.9% uptime during 200% user growth.
- Modernized legacy workflows by migrating 40+ microservices to **Kubernetes (GKE)** and **Cloud Run**.
- Developed a **self-service infrastructure platform** using **Terraform**, enabling developers to provision environments independently while maintaining security best practices.
- Optimized edge security and delivery by implementing and managing **Cloudflare** workers and WAF rules.

- Built and maintained complex **GitLab CI/CD** pipelines that integrated automated testing, security scanning, and deployment to **Artifact Registry**.

AudioFlow Systems | Remote

Cloud Infrastructure Engineer | May 2019 – Dec 2021

- Partnered with backend teams (**Java/Kotlin**) to define architectural requirements for new audio-streaming features.
- Implemented comprehensive monitoring and alerting using **Prometheus** and **Grafana**, reducing Incident Mean Time to Recovery (MTTR) by 35%.
- Authored documentation for cloud management procedures and disaster recovery protocols, serving as a blueprint for the engineering department.
- Actively explored and proposed new tools (Service Mesh/Istio) to improve the platform ecosystem's observability.

PROJECTS

- **Podcast-Scaler (Open Source)**: A Python-based utility that automates resource scaling for audio-processing workers based on queue depth.
- **Terraform-GCP-Boilerplate**: A collection of reusable IaC components for standardized, secure GCP environment setup.

CERTIFICATIONS

- **Google Professional Cloud Architect**
- **Certified Kubernetes Administrator (CKA)**

EDUCATION

Bachelor of Science in Computer Science Technical University of Berlin
